

Environmental Programs

step in. stand out.

These majors are supported by the college's strong commitment to environmental sustainability and experiential/interdisciplinary learning. Our graduates are prepared for graduate or professional school, immediate technical employment in the natural sciences or other careers such as environmental consulting, education and compliance.

Brevard College's setting in the North Carolina mountains provides a nearly unlimited number of natural laboratories where students experience hands-on learning about the environment. They also develop written and oral communication skills and problem-solving abilities through close contact with our faculty.

What makes the BC Environmental Programs unique?

- 92% of grads from the last three years are now professionally employed or in graduate school
- Interdisciplinary and experiential courses, internships, and independent research projects that incorporate the interactions between humans and nature
- Small class sizes tailored to meet the specific needs of our individual students
- Beautiful and diverse surrounding natural and cultural environment

Division of Science and Mathematics:

Major Programs:

Biology, (B.S.)
Environmental Science, (B.S.)
Environmental Studies

Scholarship Information:

New freshman and transfer students, regardless of major, may qualify for academic scholarships through the Admissions Office from \$5,500 per year to full tuition. For general inquiries about financial aid, please contact the Office of Financial Aid. Need-based Financial Aid is also available to all students who qualify as a result of filing the Free Application for Federal Student Aid (FAFSA).

What you can do with a degree in an environmental program:

- Environmental Consulting
- Wildlife Law Enforcement
- Environmental Education
- “Green Collar” Jobs
- Alternative Energy
- Sustainable Business
- Scientific Research
- Graduate or Professional School
- Habitat Restoration

You should consider majoring in an environmental program if you:

- Have an aptitude for scientific reasoning and problem solving
- Want to help save the planet
- Like to work outdoors and/or in the laboratory
- Have a basic love of and curiosity about the natural world
- Enjoy integrating the natural and cultural worlds
